

	Header	Def	Title	Key Owner	Status	What We Need to Solve	Common Options & Configurations	Recommendation	What Did We Choose?	Help Docs
	☐	☐	Authentication & Licensing			How will users receive a license and authenticate?	(Username/Password, SSO, OAuth, SAML, SCIM, OAuth, Manual Invite, Just in Time provisioning)			https://help.sigmacomputing.com/docs/training-authentic
	☐	☐	License Upgrade Requests			Will we users ask for a more robust license?	Sigma's native option, Internal request platform, Email requests			https://help.sigmacomputing.com/docs/license-upgrade-req
	☐	☐	Security and Support Portal Access			Who should be added to our Security Portal for self-serve security documents? Who should be added to our Support portal to see and track tickets across your organization?	Admins + Security team if needed			
	☐	☐	Data Security			How will we secure our data, both on a row-level and a column-level (if needed)? How will users access data to build - through Event-driven Data Model? Or directly to Snowflake?	Open Policy, RLS by User, RLS by User Attributes, OAuth, Snowflake Roles, Column Level Security			https://www.sigmacomputing.com/resources/webinars-se
	☐	☐	Cloud Warehouse Connection Strategy			What connections do we want to expose to which users? How will users know which connection to use? Do we want to leverage our risks in Sigma? Do you need PrivateLink?	One connector, multiple connections, warehouse sizing, dynamic connection switching by role, PrivateLink, customized timeouts			https://help.sigmacomputing.com/docs/connect-to-data
	☐	☐	Writeback Access			How, if at all, do we want to set up our writeback schema(s)? Do we need it to work with OAuth?	One schema, multiple permissions			https://help.sigmacomputing.com/docs/set-up-write-acce
	☐	☐	Customized Platform Settings			What defaults do we want to set for our organizations branding and other platform settings?	Custom branding (colors, fonts), and workbook settings, email settings, timezones, integrations, custom functions			https://help.sigmacomputing.com/docs/recover-time-pse
	☐	☐	AI Features & Strategy (rapidly evolving)			What AI features do we want to use to leverage in our platform? What's our strategy for leveraging our tech stack's AI capabilities thru Sigma?	Configure an AI Provider (Ask, Formula Assistant, Explain this VQL your warehouse's native LLM functions, Agents, etc.)			https://help.sigmacomputing.com/docs/configure-ai-feat
	☐	☐	Auditing & Cost Monitoring			How can we keep tabs on our warehouse costs? How can we distribute that knowledge to empower our power users? Do we want to make any audit processes for deprecating discontinued content?	Snowflake Cost Monitoring Template, Access to Usage Dashboard, Audit Log data/workbooks			https://www.sigmacomputing.com/resources/four-column
	☐	☐	Versioning & Promotion (WDLCL)			What process do we want in place, if any, for promoting workbooks and data models from Dev/QA to Prod?	Version Tagging, Protected Tags, YAMS/GitHub Integration (Data Models only)			https://help.sigmacomputing.com/docs/create-and-manag
	☐	☐	Teams Structure			What Teams do we need in place to make licensing and content sharing slick? What Custom Account Types do we need?	Align Teams with Workspaces Leverage Custom Account Types to control access to features			https://help.sigmacomputing.com/docs/training-teams
	☐	☐	Workspaces Structure			What Workspace folder structure and permissions do we need in place to align with our Teams?	Hierarchy of folders + Workspace level permissions for Teams			https://help.sigmacomputing.com/docs/training-workspa
	☐	☐	Onboarding Training Plan			How will new users get onboarded, both during Sigma implementation and in an ongoing fashion?	Live Sigma-led training, Live Internally-led training, Sigma's Live webinars, Sigma Quickstarts, Whitebelabeled Quickstarts, etc.			
	☐	☐	User & Use Case Enablement Strategy (Initial & ongoing)			What resources will we provide internally to equip our users to grow in their use of analytics and Sigma?	Intranet page, Sigma Custom homepages, on-demand training, internal support mechanisms			https://help.sigmacomputing.com/docs/training-a-custom
	☐	☐	User Community			How will we foster a community of mutual sharing, learning, and leveling up our analysts? How will we help our user community cross-pollinate?	Champion, Monthly Meetups, Data Days, Content-sharing, Message Boards, etc.
